Hotel 626 Is A Horror Game By Kororon Hotel 626 is a Horror Game by Kororon Scream up the walls of your room, escape the elevator that won't stop, kill... Hotel 626 in Horror Game By Kororon Hotel 626 3D Game in Horror. .Men I have a \$500 Dell Optiplex PC with a 40 gig drive. I would like to use it as a home server. It has a hard disk and a DVD drive but no motherboard or power supply. The only possible way to do this is to get a motherboard that will run a hard drive and a DVD drive and run off of one of the ports on my PC. I have no idea about how to do this. I have searched through the specs on the net and cannot find anything. I have also checked cables and the hardware. Anyone help would be appreciated. btw, i currently use Windows XP Pro and was using Windows Server 2003 Enterprise edition. I have an old Dell Optiplex with an IDE drive and a DVI output. I have just bought a 4 disc DVD player and a DVD drive to get a 2nd drive and a way to watch movies on my PC. Thanks for the reply. I have a old Epson Cinema a85 with a DVD drive and 2 old drives, and an adaptor from the old pachchoy splitter. I have no idea if this setup would work with a new motherboard. I have been looking at systems that I could hook up to my internet that I could control through the web through my network. I don't know if I could do this through my router, but I have heard of nettops. They look very nice. As far as
